

The Stingray

We are proud to present the Stingray tattoo machine. The goal to create a tattoo machine that can make lines like a coil machine and still have the benefits of a rotary machine has been a vast challenge. Although the Stingray looks very similar to the Dragonfly it is a completely new type of tattoo machine with a Desmodromic roller cam system.

The new cam system enables to create a needle motion that is perfect for lining and color packing. Like a coil machine but without the weight, the aggressive sound and naturally with greater precision and consistency. The cam system allows you to change the stroke length and also the ability to totally change the characteristics and behavior of the machine by changing to different cams. Changing the cam is easy and takes only a few minutes.

The Stingray is Patent Pending.

Specifications

Input voltage	0 - 13 volt DC (max. 13 volt DC)
Power connections	RCA or clipcord (max. clipcord end diam Ø1,6 mm)
Rpm range	0 - 8 000 rpm / min
Stitches / sec	0 - 130 / sec
Stroke length	2,6 - 3,5 mm depending on cam used
Suspension stroke	0 - 2 mm
Max. tube diam Ø	Ø8 mm
Max. needle size	50 magnum
Weight	85 grams
Dimensions LxBxH	95 x 21 x 75 mm

Core benefits

- Lightweight (only 85 grams)
- Silent
- Low vibrating
- Ergonomic
- Don't need rubberbands
- Adjustable hitting force
- Accepts standard grips, tubes and needles
- Both clipcord & RCA connections
- Works with most power supplies 0-13V
- Ideal for lining and packing color
- Exchangeable cams for different stroke lengths
- Normally stops in upper position
- No moving components in contact with plastic barrier
